Education

K.J. Somaiya College of Engineering

B.Tech in Computer Engineering — CGPA: 8.26

12th ISC: 90.4%

10th ICSE: 93.3%

Mumbai, India

Oct 2022 – May 2026

Experience

Associate Engineer

StoneX Group Inc.

Aug 2026 – Present

Pune, India

- Developed and integrated **APIs for end-to-end payment workflows** across multiple banking clients, enabling service-to-service communication throughout the transaction lifecycle.
- Developed and integrated an **ACH payment flow** for a banking client, supporting end-to-end transaction processing within the XPay platform.
- Implemented reusable application components and workflow logic for the **XPay Global Payments platform**, supporting complex banking and payment-processing requirements.
- Investigated and resolved application issues through **log analysis, root-cause investigation, and cross-service workflow tracing**, working with development teams to deliver fixes.
- Contributed to feature development, integration validation, and release activities in an **Agile engineering environment**, working across application and payment-processing flows.

Intern

StoneX Group Inc.

Jan 2026 – Jul 2026

Pune, India

- Developed **Playwright-based automation** for multiple banking clients across Instruction Matching, Trade Integration, MT103, and MT210 payment workflows.
- Optimized Azure DevOps CI/CD pipelines using **Dynamic Sharding and automated scheduling**, reducing regression execution time from **3.5 hours to 1.5 hours**.
- Expanded regression coverage, analyzed failures, and collaborated with developers to reproduce defects and validate fixes across critical payment workflows.

Software Engineer Intern

ITFMS Infotech Pvt. Ltd

Jun 2025 – Jul 2025

Pune, India

- Developed a backend resume parsing and candidate-matching system using **Python, Flask, PostgreSQL, spaCy, and SentenceTransformers**.
- Built data-processing pipelines to extract structured candidate information from resumes and persist results using **SQLAlchemy and PostgreSQL**.
- Implemented semantic candidate-job matching using embeddings, fuzzy matching, and LLM-assisted scoring to automate candidate shortlisting workflows.

Projects

Trade Harbour | Python, React, Firebase, Machine Learning

2025

- Built financial computation modules for stock prediction, options pricing using the **Black–Scholes model**, and long-term SIP return calculations.
- Integrated application logic with Firebase Authentication and backend data services for secure user sessions and persistent application data.

MERN Blog | Node.js, Express.js, MongoDB, React, Firebase

2024

- Developed REST-based backend functionality using **Node.js, Express.js, and MongoDB** for CRUD operations, authentication, comments, and image-management workflows.

Technical Skills

Languages: Java, MongoDB, C/C++, Python, JavaScript, SQL (PostgreSQL)

Backend & Frameworks: Flask, Springboot, Node.js, Express.js, REST APIs, SQLAlchemy, Playwright, Karate

Databases & Tools: PostgreSQL, MongoDB, Firebase, Git, Azure DevOps, GCP

Core Concepts: Data Structures & Algorithms, OOP, DBMS, API Integration, CI/CD, Debugging

Competitive Programming

CodeChef: 3★, Max Rating 1634 | **Codeforces:** Specialist, Max Rating 1452 | **LeetCode:** 500+ problems solved
